List of Contents

NUMBER 1

Kiyoshi Kawabata and **Takehiko Satoh** — 1 Numerical computations of Neumann expansion coefficients of Chandrasekhar's H-function for isotropic scattering

D. Cerny, R. Bacis, A. J. Bouvier, S. Poulat, A. Topouzkhanian, and **J. Vergès** — 9 The dissociation of molecular iodine by metastable oxygen—I. Populations of $A\ 1u$ and $B\ 0_u^+$ iodine states through Fourier transform spectrometry analysis

Fuzhong Weng — 19 A multi-layer discrete-ordinate method for vector radiative transfer in a vertically-inhomogeneous, emitting and scattering atmosphere—I. Theory

Fuzhong Weng — 35 A multi-layer discrete-ordinate method for vector radiative transfer in a vertically-inhomogeneous, emitting and scattering atmosphere—II. Application

John R. Reisel, Campbell D. Carter, and **Normand M. Laurendeau** — 43 Einstein coefficients for rotational lines of the (0, 0) band of the $NO\ A^2\Sigma^+ - X^2\Pi$ system

Steven A. Siano — 55 Deconvolution of multicomponent fluorescence spectra in the presence of absorption inner-filter effects

L. G. D'yachkov and **P. M. Pankratov** — 75 On the calculation of bound–bound, bound–free and free–free dipole transitions in a non-hydrogenic atom

NUMBER 2

G. Millot, B. Lavorel, and **J. I. Steinfeld** — 81 Collisional broadening of rotational lines in the stimulated Raman pentad Q-branch of CD_4

Zdeněk Slanina, Kenneth Fox, and **Sang J. Kim** — 91 Application of the Stogryn–Hirschfelder treatment of weak dimers to planetary atmospheres

S. Tiné, S. Aiello, A. Belleni, and **C. Cecchi Pestellini** — 95 A solution to the problem of radiation transfer in inhomogeneous media using the SHM

C. Gabbanini, M. Biagini, S. Gozzini, A. Lucchesini, A. Kopystynska, and **L. Moi** — 103 Electronic energy transfer in a dense level system

P. Meenakshi RajaRao, S. Padmanabhan, G. Krishnamurty, and **B. N. Raja Sekhar** — 113 Reinvestigation of some of the autoionizing levels in the spectrum of CuI

J. F. Geurdes	121	A relation between the Schrödinger and radiative transfer equations
Patrick Blottiau and **Gilles Damamme**	127	Improvement of the screened hydrogenic model for matter in dense plasmas
R. S. Ferber, Ya. A. Harya, and **A. V. Stolyarov**	143	Intensities and electronic transition strengths of seven Te_2 visible and i.r. band systems

NUMBER 3

Xun Zhu	159	The correlated-k coefficients calculated by random band models
Joseph Nilsen	171	Resonantly photo-pumped Na-like X-ray lasers
Wilhelmus M. Ruyten	179	Calculation of the quasi-energies and resonance behavior of the hydrogen Lyman-α problem
W. L. Wiese and **N. Konjević**	185	Regularities in experimental Stark shifts
Jerry C. Ku and **Kyoung-Hoon Shim**	201	A comparison of solutions for light scattering and absorption by agglomerated or arbitrarily-shaped particles
M. T. Attia, M. A. Madkour, E. M. Abulwafa, and **M. M. Abd-Elnaby**	221	Anisotropic radiation transfer in a plane medium with specularly-reflecting boundary conditions
V. P. Solovjov	229	Solution of the radiative transfer equation by the moment method using polynomials of special form

NUMBER 4

J. F. Brannon Jr. and **P. Varanasi**	237	Tunable diode laser measurements on the 951.7393 cm^{-1} line of $^{12}C_2H_4$ at planetary atmospheric temperatures
J.-P. Bouanich	243	Site–site Lennard–Jones potential parameters for N_2, O_2, H_2, CO and CO_2
Prasad Varanasi	251	Absorption spectra of HCFC-22 around 829 cm^{-1} at atmospheric conditions
K. Kamiuto	257	Radiative properties of packed-sphere systems estimated by the extended emerging-intensity fitting method
Prasad Varanasi	263	Intensity and linewidth measurements in the 13.7 μm fundamental bands of $^{12}C_2H_2$ and $^{12}C^{13}CH_2$ at planetary atmospheric temperatures

M. Godon, J. Carlier, and A. Bauer — 275 Laboratory studies of water vapor absorption in the atmospheric window at 213 GHz

Y. Hasegawa, K. Morita, H. Kawai, H. Yamasaki, and S. Shioda — 287 Reduced absorption coefficient of the first resonance line of Cs in high-temperature helium

M. I. Flik and Z. M. Zhang — 293 Influence of nonequivalent detector responsivity on FT–IR photometric accuracy

E. Vermote and D. Tanré — 305 Analytical expressions for radiative properties of planar Rayleigh scattering media, including polarization contributions

NUMBER 5

Milan S. Dimitrijević — 315 Stark-broadening parameters of ionized mercury spectral lines of astrophysical interest

E. Hudis, Y. Ben-Aryeh, and U. P. Oppenheim — 319 The contribution of third order linear absorption to the water vapor continuum

E. Sohns and M. Kock — 325 Plasma diagnostics based on self-reversed lines—I. Model calculation and application to argon arc measurements in the near-infrared and vacuum ultraviolet regions

E. Sohns and M. Kock — 335 Plasma diagnostics based on self-reversed lines—II. Application to nitrogen, carbon and oxygen arc measurements in the vacuum ultraviolet

V. Le Dez and M. Lallemand — 345 Thermal emission of axisymmetric bodies of semi-transparent materials

A. Goly, G. Łopatka, and T. Wujec — 353 Some properties of a plasma generated between two ferroelectric ceramic plates

S. M. Ahmed and Vijay Kumar — 359 Quantitative photoabsorption and fluorescence spectroscopy of SO_2 at 188–231 and 278.7–320 nm

A. Y. Chang, M. D. DiRosa, and R. K. Hanson — 375 Temperature dependence of collision broadening and shift in the NO $A \leftarrow X$ (0,0) band in the presence of argon and nitrogen

D. Goorvitch and D. C. Galant — 391 Schrödinger's radial equation: solution by extrapolation

M. I. Mishchenko, J. M. Dlugach, and E. G. Yanovitskij — 401 Multiple light scattering by polydispersions of randomly distributed, perfectly-aligned, infinite Mie cylinders illuminated perpendicularly to their axes

Carmen Lavin, Carmen Barrientos, and Inmaculada Martín — 411 Quantum-defect studies of transitions in the diffuse spectral series of the potassium isoelectronic sequence

Randy Longenbaugh and **Larryl Matthews** 421 Radiation transport in sooty pool fires: measurement and analysis

Note
J. Vlček 431 Comment on two new collisional-radiative models for an argon plasma

NUMBER 6

Editorial iii

Editorial v

P. H. Hauschildt 433 A fast operator perturbation method for the solution of the special relativistic equation of radiative transfer in spherical symmetry

Douglas S. Baer and **Ronald K. Hanson** 455 Tunable diode laser absorption diagnostics for atmospheric pressure plasmas

F. Kuik, J. F. de Haan, and **J. W. Hovenier** 477 Benchmark results for single scattering by spheroids

W. M. F. Wauben and **J. W. Hovenier** 491 Polarized radiation of an atmosphere containing randomly-oriented spheroids

D. Goorvitch and **D. C. Galant** 505 The solution of coupled Schrödinger equations using an extrapolation method

K. Subramanyam Naidu and **S. Buddhudu** 515 Absorption properties of Nd^{3+}-doped $(NaPO_3)_6$–$BaCl_2$–$ZnCl_2$–RCl glasses

Akihiro Uchiyama 521 Line-by-line computation of the atmospheric absorption spectrum using the decomposed Voigt line shape

Suresh Chandra and **Lalan Prasad** 533 Spatial profiles of lines in steady-state coronal loops
